Preparation for alarm system

Zürich series has standard holes that enable the installation of alarm system components.

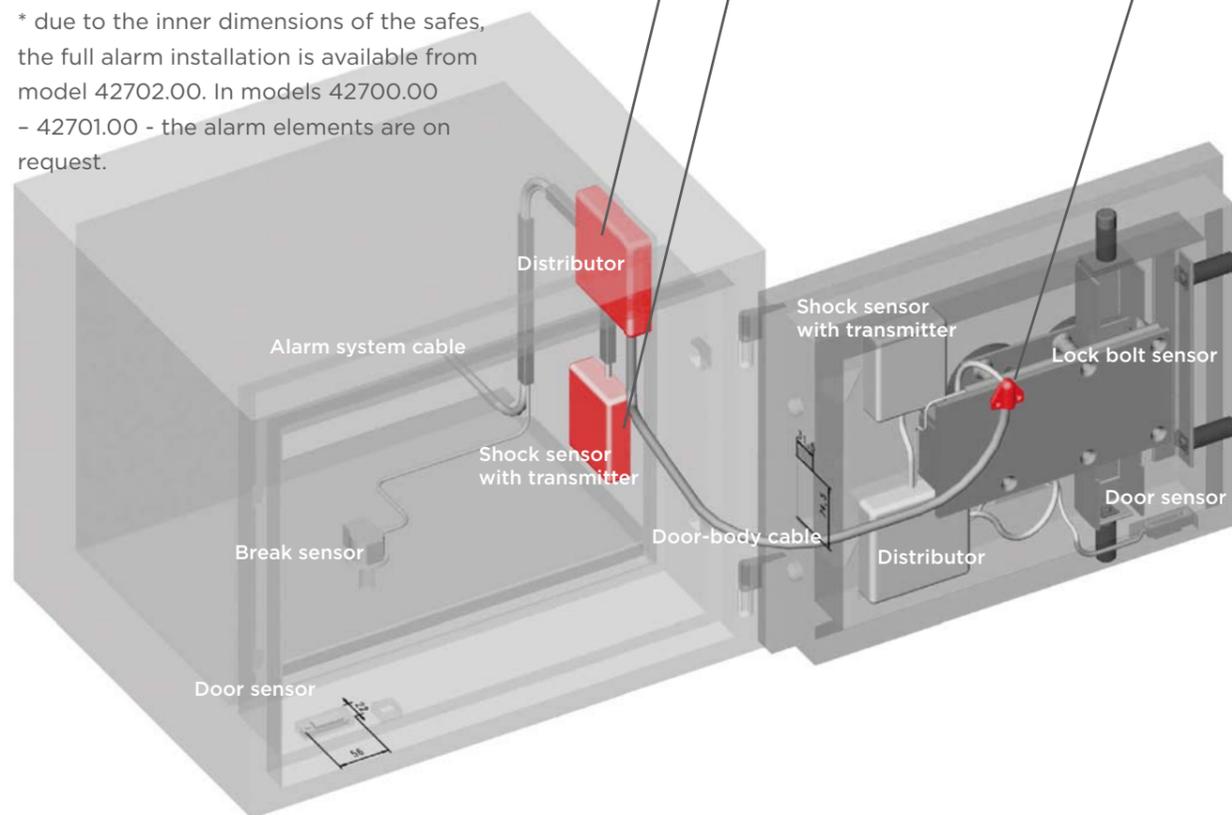

Alarm system (EMA)

- complete set (also available in single positions).

When installing the alarm system or single components, the safe is equipped with the bottom cover, which diminishes the safe space inside by 30 mm.

* due to the inner dimensions of the safes, the full alarm installation is available from model 42702.00. In models 42700.00 - 42701.00 - the alarm elements are on request.

The alarm system is an equipment used to receive a signal from alarm detectors, their processing, control and initiation of further transmission which aims to protect people and rooms.

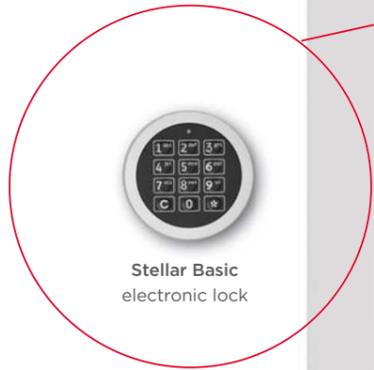

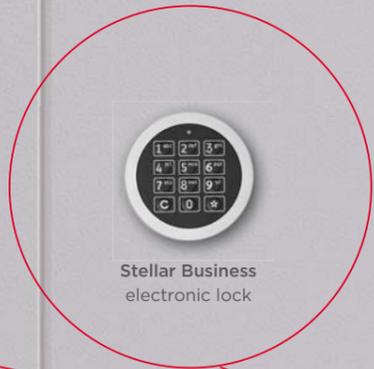

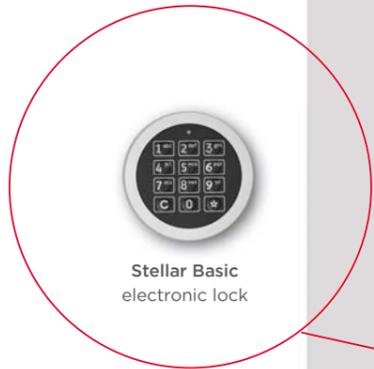

Depending on the components installed the alarm system is designed to:

- reducing the probability of theft, burglary, etc.
- sending alarm signals (to the police or security agencies)
- immediate notification people around one about attempt burglary
- help in the story reconstruction when trying to steal the safe
